About the Author

I grew up in an age when being a geek wasn't quite as fashionable as it is today. I used to subdue my nerdiness growing up in the 90's and early 2000's because of a perceived stigma I associated with it. But today? Well, let's just say I let my geek flag fly! Whether it's a new gadget, scientific discovery, piece of hard-to-understand software, or a complex but highly applicable math equation--I love discussing it and teaching it in easy-to-understand language to my peers and readers.

These days I spend a great deal of my time learning and using different electronic devices and computer programs. I've found that the more I discover, the more I like to share with my readers. Plus, most electronics and computer technologies don't give you complete and user-friendly guidance--so I try to fill in the void as much as possible so you can benefit from it.

I also love staying current with the world of Physics and Science, so expect to see more titles in these genres in the future.

Thanks for visiting my page, and I hope I can provide you with tons of value in these books!

Logan Styles, Amazon Echo Dot and Me

By Gerald

This book was as easy to read and written in such an informing way that every page gave me ten more things to think about... I am only a little more than a beginner in that I have only touched my Echo Dot and (realizing I didn't know JACK) laid it aside for a couple of weeks.

I read this little book twice and could not believe how little I knew about Alexa. I now have a plan to move forward and the read more buy more is my plan. Thanks for the book.

Best Gift

By Joanne

I got this for a gift for my daughter. Every time I speak with her she says how much she likes this. It keeps doing more and more things. Turning on lights, changing the heat in the house to telling the temp and time. So many things I cannot even begin to remember. This was a great gift .
