BLACK SKY BY WILLIAM H. LOVEJOY PDF

'Lovejoy has proven himself a master storyteller.' - Clive Cussler

Cruising at a 'black sky' altitude of 130,000 feet, in the cockpit of the newly engineered XSO suborbital jet, U.S. Lieutenant Commander Dallas Grant reports the explosion of a Poseidon missile just minutes after its successful deep sea launch.

But then he uncovers a strange aerial attack by another suborbital craft of unknown origin equipped with military technology thought to be available only to the United States and the Soviet Union.

A silent and unidentified mystery is flying and is a threat that needs to be formally detected.

The most recent in a series of unexplained near-space disasters, the attacks are costing international state powers billions and eroding the reputation of all global satellite operation and research.

Classified data is valuable and as leaks appear emergency intelligence analysis profiles a plot by Nesei Aerospace Industries.

The Japanese munitions and communications giant could be attempting to control all black sky programs, a prospect which would undoubtedly create global chaos and economic collapse, and soon.

An atmosphere of anxiety and paranoia sets in awaiting authorisation from the President as cameras rouse suspicious, films are unaccounted for and an official record of leaked classified data is called for.

Police are to be avoided, until a body warrants calling in the FBI.

Urgent Orders are sent to Grant and his colleague Dmitri to combine their 21st century black sky warrior strike squads in an apparently unofficial war that has already been initiated. Aware of the dangers both men consider the women they leave at home and whether they will ever return from this mission, or if they will be captured as prisoners.

Grant and his colleague Colonel Dmitri Vidorov are sent to fight the ultimate high-tech war to free the newest, most dangerous frontier of all...

Dog fights at 300k feet

By Norm

The author is well-versed in his subject with very technical explanations which fit well into his story. The novel is older, but although dated, kept me enthralled to the end. The old Russia vs. U.S. is there, but with a new adversary which requires their close cooperation to defeat. Makes me want to research and learn more about the possibilities of intra-orbital flight, both military and commercial. The characters were very realistic - both good guys and bad guys.

Exceptionally Enjoyable

By Martin Fricke

Everything you could want in a thrilling aerospace war novel. Action cover-to-cover, including combat both in flight and in DC. Rich character development and perfectly written.

Suborbital experimental planes ran into opposition they did not expect...

By K. Chang

Black Sky is about a joint US Russia program to develop ultra-high flying sub-orbital craft (higher and faster than the vaunted SR-71) and how it ran into a mysterious opponent, who seem to be present whenever there is a satellite or payload launch malfunction. While the writing and flying is great, the plot seem to plod along slowly, as the opponents have been shown early, albeit separate from each other and you know they are going to collide, rather than presented as a mystery from one side's view only. There's some additional plot points about spies, intrigue, bungling bureaucracy, and so on that doesn't add too much to the plot, IMHO, of course. Reads a bit like slower paced version of a Dale Brown novel.

Recommended if you like the subject and his previous books. Not a must-read though.
