Uniquely valuable perspective

By Pete Likins

Only Clark Kerr could present such a valuable perspective on the modern history of the University of California, as presented in his two volume personal memoir, of which this is the second volume, dealing with external interactions of the university and specifically of the Berkeley campus.

Clark Kerr is surely among the most important leaders of American universities of all time. As professor, Berkeley Chancellor and University of California System President, Kerr played seminal roles in the modern history of the University of California. In his memoir he offers a unique perspective on the period of his experience in this system, which by chance or by his efforts became a transformational period in the history of his university and by extension all of American higher education.

Kerr's exposition is straightforward and remarkably free of the bias that must be expected in such a personal history. He requires two very large volumes to tell his story, but for those of us who care about such things the time invested in reading is well spent.
